## Product range

## Series 10

Pitch 25.4 mm (1 in)

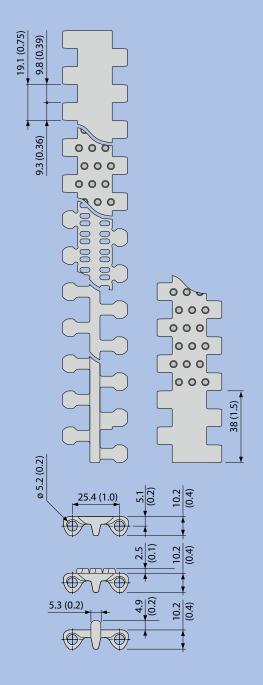

#### Siegling Prolink

## Series 10

Straight running, pitch 25.4 mm (1 in)

25.4 mm (1 in) pitch straight running belt for light and medium-duty hygiene-critical applications.

#### Design characteristics

- small number of eyelets ensures easy cleaning
- hinges that open wide, combined with smooth, flat channels on the underside and a continuous drive bar produce an easy-to-clean design
- robust design guarantees superior durability
- optimal design of sprocket teeth and tracking fins provides superior sprocket engagement, safe belt tracking and an easy-to-clean sprocket

#### Special features

- open area for excellent air circulation and drainage (2 versions for different product sizes)
- nub top surface for excellent release of wet and sticky products
- open area lateral rib version for small inclines and gentle conveying of delicate products
- profiles with no cling surface to improve release of wet and sticky
- side guards for retention of bulk products

#### Belt types

#### S10-0 FLT

Closed, smooth surface

#### **S10-0 NTP**

Closed surface with round studs 5% contact area Version available without round studs at the side (38 mm indent)

#### S10-22 FLT

Open (22%), smooth surface 55% contact area (Largest opening: 2.6 x 5.3 mm/0.10 x 0.21 in)

#### S10-36 FLT

Open (36%), smooth surface 26% contact area (Largest opening: 5.7 x 13.3 mm/0.22 x 0.52 in)

#### S10-36 LRB

Open (36%) surface and lateral ribbing 5% contact area\* (Largest opening: 5.7 x 13.3 mm/0.22 x 0.52 in)

#### Pitch

25.4 mm (1 in)

#### Belt width min.

38.1 mm (1.5 in)

#### Width increments

In increments of 19.05 mm (0.75 in)

Hinge pins 5 mm (0.2 in) made of plastic (PE, PP, PBT)

#### **Declaration of compliances/Certificates**

See fold-out page

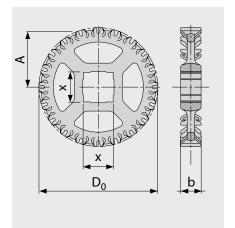

#### Drum motor

Power transmission using drum motors with rubber coating and profiles applied is possible. Please enquire.

#### Temperature ranges in °C

#### Temperature ranges in °F

#### **HACCP** types

Series 4.1, 6.1 and 10 in particular support your HACCP concept with a number of hygiene-friendly characteristics. These features include:

#### Easy-to-clean design

with wide channels underneath the module

#### **Excellent resistance to hydrolysis**

 resistant to hot water, cleaning agents and disinfectants

#### Good release properties

- beneficial when manufacturing adhesive foodstuffs (minimal product wastage)
- product residue is easy to remove
- easy-to-clean hinge design

#### Blue a strong colour contrast

- soiling is easier to identify
- suitable for usage in optical sorters
- reduces light reflection, making working conditions better

#### Declaration of compliances/ Certificates

#### FDA/EU

Siegling Prolink modular belts made of PE, PP, POM and PA comply with FDA 21 CFR as well as the (EU) 10/2011 and (EC) 1935/2004 regulations regarding the raw materials used and the migration thresholds.

#### Halal

All Siegling POM Prolink modular belts are certified as being compliant with the Halal regulations by IFRC Asia (member of the World Halal Council).

#### Materials

#### PE (Polyethylene)

- very good chemical resistance to acids and alkalis
- very good release properties due to low surface tension
- good friction and abrasion behaviour
- extremely tough
- low specific weight

#### PP (Polypropylene)

- standard material for normal conveying applications
- quite strong and stiff
- good dynamic capacity
- highly resistant to acids, alkalis, salts, alcohols
- low specific weight
- no risk of stress cracks forming

#### POM (Polyoxymethylene/Polyacetal)

- very dimensionally stable
- very strong and stiff
- high chemical resistance to organic solvents
- lower drag
- very durable material
- hard, incision-resistant surface

#### POM-CR (POM cut resistant)

- highly resistant to impact and incision
- easy to clean
- minimal ridge formation
- low risk of material delamination

#### POM-HC (POM highly conductive)

- highly conductive material
- surface resistivity < 10<sup>6</sup> Ω
   (according to specification)
- very strong and stiff
- very good friction and abrasion properties

#### POM-MD (POM metal detectable)

- material easily detected in metal detectors
- very strong and stiff
- very good tribological properties (friction and abrasion levels)

#### PA (Polyamide)

- good wear resistance in dry applications
- short-term temperature resistance up to 135°C (275°F)
- good fatigue resistance

#### PA-HT (Polyamide high temperature)

- material reinforced with fibre glass
- very high short-term temperature resistance up to 180  $^{\circ}\text{C}$  (356  $^{\circ}\text{F})$
- absorbs little water in humid environments
- very stiff
- durable

### PXX-HC (self-extinguishing highly conductive material)

- flame retardant in line with DIN EN 13501-1 (C<sub>fl</sub>-s1 and DIN 4102 (B1)
- surface resistivity  $< 10^6 \, \Omega$
- specially for use in the automotive industry

#### PBT (Polybutylenterephthalate)

- good wear resistance
- very good abrasive resistance
- good strength and stiffness
- not recommend for use in hot water >60 °C (140 °F)

Committed staff, quality-orientated organisation and production processes ensure the constantly high standards of our products and services. The Forbo Siegling Quality Management System is certified in accordance with ISO 9001.

In addition to product quality, environmental protection is an important corporate goal. Early on we also introduced an environmental management system, certified in accordance with ISO 14001.

#### Forbo Siegling service – anytime, anywhere

The Forbo Siegling Group employs more than 2,000 people. Our products are manufactured in nine production facilities across the world. You can find companies and agencies with warehouses and workshops in over 80 countries. Forbo Siegling service points are located in more than 300 places worldwide.
